WEBSITE Analytics Report

July 2026

EXECUTIVE SUMMARY

New or returning ...	Page views	Site sessions	Unique visit...	Bounce rate	Avg. session ...
Summary	319	156	78	73%	3m, 52s
New	176	84	70	69%	2m, 56s
Returning	143	72	8	78%	5m, 46s

TOTAL VISITORS OR UNIQUE VISITORS	**78**
TOTAL SESSIONS	**156**
NEW VS RETURNING VISITORS	**70 VS. 8 (90% / 10%)**
TOP TRAFFIC SOURCE	**101**

The website achieved 156 sessions (-7%) and 78 unique visitors (-33%), with traffic peaking at 15 single-day sessions around July 20th. Total engagement reached 319 page views with an average session duration of 3 minutes and 52 seconds. Direct traffic was the leading source (101 sessions), followed by Google Organic (22), manage.wix.com Referral (14), and Facebook Organic (11). The platform successfully attracted new audiences (90% new visitors), with desktop remaining the dominant channel at 88% over mobile's 12%.

TRAFFIC OVERVIEW

COMPARISON

June 2026

July 2026

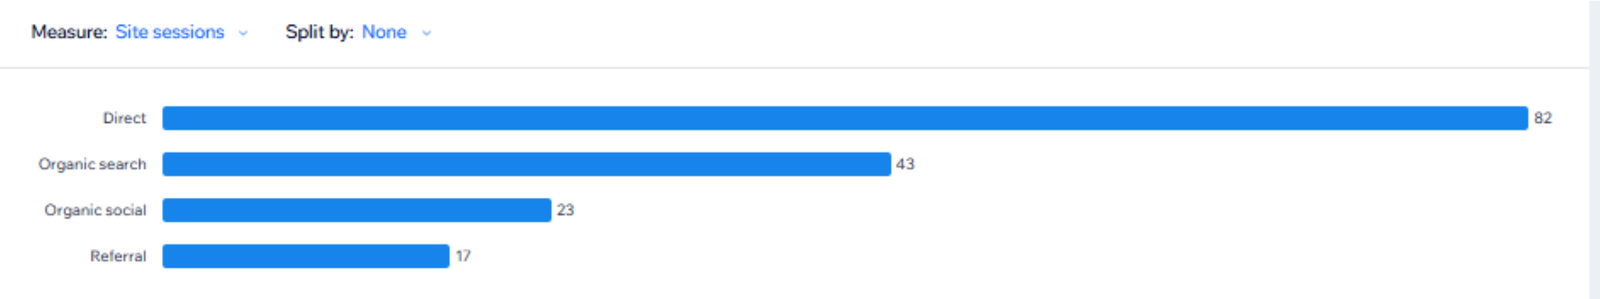

In July 2026, overall website activity experienced a slight contraction compared to June 2026 across both overall traffic volume and unique visitor counts. Site sessions decreased from 167 to 156 (-6.6%), while unique visitors saw a sharper decline, dropping from 116 to 78 (-32.8%). Daily traffic distribution also showed a lower overall ceiling: while June recorded a pronounced peak of over 20 single-day sessions around June 10th, July's highest activity spike reached only 15 single-day sessions around July 20th.

TRAFFIC SOURCE

COMPARISON

June 2026

July 2026

In July 2026, website growth was primarily driven by Direct traffic, which increased from 82 to 101 sessions (+23.2%), solidifying its position as the top traffic channel. However, this growth was offset by steep declines in search and social acquisition: Organic Search dropped from 43 to 25 sessions (-41.9%), and Organic Social fell from 23 to 13 sessions (-43.5%). Meanwhile, Referral traffic remained completely flat month-over-month at 17 sessions (0.0%).

In July 2026, geographic traffic shifted significantly as the Philippines surpassed the United States as the top market for volume, while total overall engagement contracted. In the Philippines, Site sessions grew from 61 to 84 (+37.7%) and Page views increased from 134 to 165 (+23.1%), despite Unique visitors cutting in half from 26 to 13 (-50.0%). Conversely, the United States saw marked declines across all key metrics, with Site sessions dropping from 86 to 59 (-31.4%), Unique visitors falling from 72 to 55 (-23.6%), and Page views nearly halving from 201 to 106 (-47.3%). Among smaller markets, the United Arab Emirates showed strong growth, with Site sessions edging up from 5 to 6 (+20.0%) and Page views surging from 11 to 30 (+172.7%).

TRAFFIC BY DEVICE

COMPARISON

June 2026

Device type	Page views	Site sessions ↓	Unique visitors
Summary	378	165	114
Desktop	231	108	70
Mobile	147	57	44

July 2026

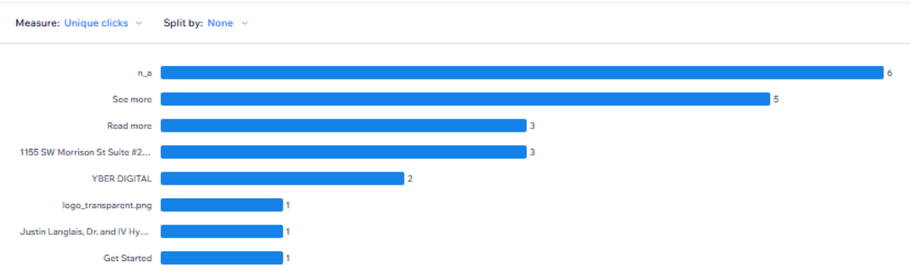

Device type	Page views	Site sessions ↓	Unique visitors
Summary	319	156	78
Desktop	280	137	62
Mobile	39	19	16

In July 2026, device usage shifted heavily toward Desktop, which strengthened its dominant market share, while Mobile traffic experienced a steep decline. Desktop site sessions increased from 108 to 137 (+26.9%) and page views grew from 231 to 280 (+21.2%), despite unique visitors dropping slightly from 70 to 62 (-11.4%). In contrast, Mobile metrics plummeted across the board: site sessions fell from 57 to 19 (-66.7%), page views dropped from 147 to 39 (-73.5%), and unique visitors decreased from 44 to 16 (-63.6%). Overall, strong Desktop growth helped cushion the total site performance, though severe Mobile pullbacks led to a drop in total site engagement.

In July 2026, user engagement across site buttons and links experienced a slight pullback, with total unique clicks decreasing from 17 to 14 (-17.6%) and overall unique visitors exposed to these elements dropping from 105 to 56 (-46.7%). YBER DIGITAL emerged as a primary driver of engagement, expanding from 2 unique clicks in June to 4 total unique clicks in July (+100.0%). Content discovery links like See more remained solid with 4 total clicks in July, while Read more held steady at 3 clicks (achieving a top individual CTR of 5% on the About Us page). Meanwhile, phone contact clicks (+1 503 507 9067) doubled from 1 click to 2, and high-intent actions like Schedule Now! generated 2 unique clicks at a 4% CTR.

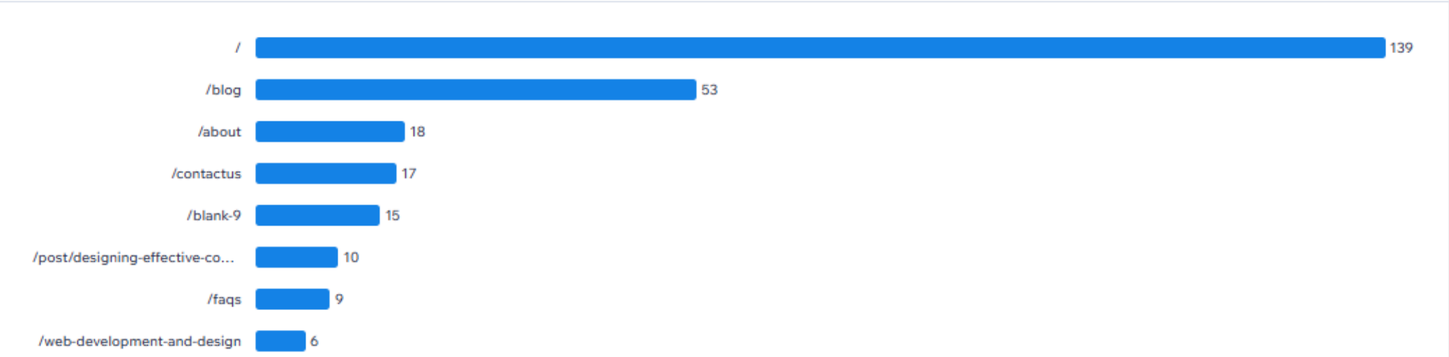

TOP-PERFORMING PAGES

COMPARISON

June 2026

July 2026

In July 2026, page view distribution shifted toward content discovery, with the blog page seeing a major breakout despite an overall drop in homepage traffic. The homepage (/) remained the top-visited page, though views decreased from 253 to 139 (-45.1%). Conversely, /blog surged as the second most-visited destination, jumping from 9 to 53 page views (+488.9%). High-intent pages held relatively stable: /contactus increased from 14 to 17 views (+21.4%), while /about dropped from 27 to 18 views (-33.3%) and /blank-9 fell from 26 to 15 views (-42.3%). Additionally, /faqs held flat at 9 page views, while new entry pages like /post/designing-effective-co... (10 views) and /web-development-and-design (6 views) contributed fresh engagement.

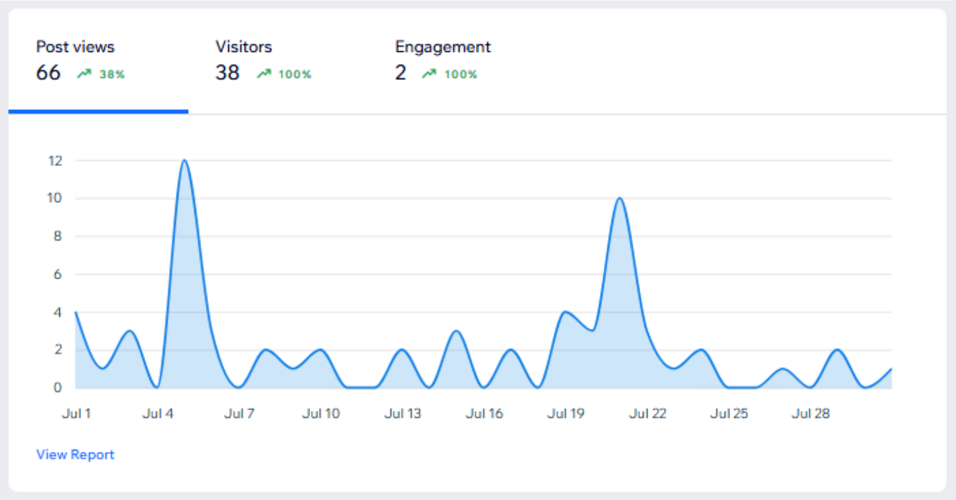

TOP BLOG POSTS

COMPARISON

June 2026

July 2026

In July 2026, editorial content performance saw significant overall growth across all primary engagement metrics compared to June 2026. Total Post views increased from 47 to 66 (+40.4%), driven by a doubling in reader reach as Visitors grew from 18 to 38 (+111.1%). Direct user interactions also improved, with overall Engagement rising from 1 to 2 (+100.0%). Additionally, peak single-day readership expanded considerably: while June's highest daily spike reached 6 post views (around June 20th), July recorded two major traffic surges, reaching a peak of 12 views around July 5th and another spike of 10 views around July 20th.

KEY INSIGHTS & RECOMMENDATIONS

- **What worked**
  - Direct Acquisition Surge: Direct traffic expanded significantly by +23.2% (82 to 101 sessions), cementing its position as the dominant acquisition channel.
  - Desktop Performance Recovery: Desktop engagement bounced back strongly, with site sessions rising +26.9% (108 to 137) and page views increasing +21.2% (231 to 280).
  - Blog & Content Expansion: Content readership surged, with total /blog page views jumping +488.9% (9 to 53 views) and total post views climbing +40.4% (47 to 66 views).
  - International Audience Growth: Traffic from the Philippines grew to become the primary geographical driver, with sessions increasing +37.7% (61 to 84 sessions) and page views rising +23.1% (134 to 165).
- **What needs improvement**
  - Mobile Channel Collapse: Mobile engagement experienced sharp pullbacks across all metrics, with sessions plummeting -66.7% (57 down to 19) and page views dropping -73.5% (147 down to 39).
  - Inbound Channel Declines: Search and social channels lost momentum, as Organic Search fell -41.9% (43 down to 25 sessions) and Organic Social dropped -43.5% (23 down to 13 sessions).
  - Homepage Traffic Reduction: Page views on the main homepage (/) fell -45.1% (253 down to 139 views), leading to a -32.8% drop in overall unique visitors (116 down to 78).
  - US Market Contraction: Engagement from United States visitors decreased across key metrics, with site sessions dropping -31.4% (86 down to 59 sessions) and page views falling -47.3% (201 down to 106).
- **What to do next**
  - Diagnose Mobile Experience Issues: Conduct a technical audit on mobile responsiveness and performance to identify the root causes behind the -66.7% drop in mobile sessions.
  - Revive Inbound Search & Social Strategies: Re-evaluate SEO and social publishing schedules to recover lost acquisition momentum across Organic Search and Social channels.
  - Capitalize on Blog Traction: Leverage the +488.9% surge in blog traffic by adding strong internal links and CTAs within top articles to funnel readers toward core service pages.
  - Optimize Funnel for Direct Visitors: Streamline navigation on the homepage to better convert the growing volume of direct visitors into active leads.
