TRAFFIC BY LOCATION

Monthly website performance overview

Country	Page views ↓	Site sessions	Unique visitors	Avg. sessions by ...
Summary	549	312	227	10
United States	344	192	175	6
Philippines	162	80	13	3
Singapore	10	10	10	1
China	4	4	4	1
United Arab Emirates	3	3	3	1

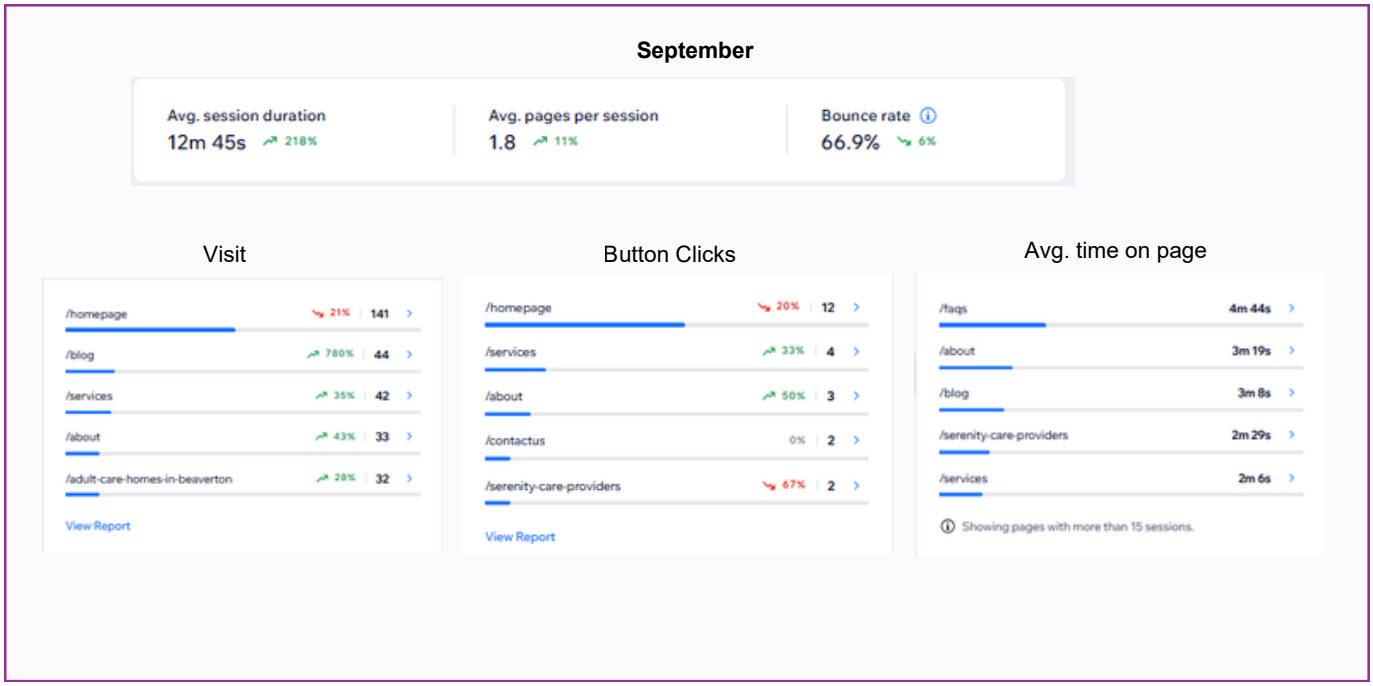

KEY TAKEAWAYS

- Top Traffic Source: The United States accounts for the vast majority of engagement, generating ~62.7% of total page views (344) and 175 unique visitors.
- Highest Engagement per Visitor: Users from the Philippines show a high concentration of views per visitor, generating 162 page views across only 13 unique visitors.

YBERDIGITALS

Behavior Overview

Core GA4 metrics with month-over-month comparison

Metric	September 2026
Avg. session duration	12m 45s
Avg. session per session	1.8
Bounce rate	66.7%

Key Metrics & Engagement Trends

- User Dwell Time Surged: Average session duration grew dramatically by 218% month-over-month, reaching 12 minutes and 45 seconds.
- Deeper Content Exploration: Average pages per session increased by 11% to 1.8, indicating users are navigating beyond their initial landing page.
- Improved Retention: Bounce rate dropped by 6% to 66.9% (recorded as 66.7% in summary metrics), reflecting stronger initial page relevance and user retention.

September

August

Area	September	August	Change
Post views	354	396	+19.58%
Visitors	243	195	+24.62%
Engagement	0	0	0

WHAT HAPPENED THIS PERIOD

- Post Views: Total post views grew by 19.6% month-over-month (increasing from 296 in August to 354 in September).
- Visitors: Unique visitor traffic grew by 24.6% (rising from 195 in August to 243 in September).
- Engagement: Engagement remained unchanged, with 0 interactions recorded in both August and September.

YBERDIGITALS

INSIGHTS & RECOMMENDATIONS

Key Strategic Insights

- **High Intent, Low Conversion Pathway:** While average session duration surged by 218% to 12 minutes and 45 seconds and pages per session grew to 1.8, total button clicks on key service and contact pages remain low (e.g., only 4 clicks on /services and 2 on /contactus). Users are consuming content heavily without taking action.
- **Social & Referral Momentum vs. Search Slip:** Organic search traffic dipped by 8.9% (123 down to 112 visits), but Referral traffic surged by 320% (5 to 21) and Organic Social expanded by 59.1% (22 to 35). Emerging channels like AI Platforms (2 visits) are also starting to contribute.
- **Desktop Dominance & Mobile Friction:** Desktop traffic grew by 28.3% (184 to 236), whereas mobile sessions dropped by 13.5% (89 down to 77). The mobile user experience may be hindering potential growth on handheld devices.
- **Geographic Value Concentration:** The United States generates the vast majority of volume with 192 sessions and 344 page views, but international visitors—specifically from the Philippines—demonstrate intense engagement with 162 page views across just 13 unique visitors (~12.5 page views per visitor).
- **Passive Blog Readership:** Blog post views grew by 19.6% (296 to 354) and unique blog visitors rose by 24.6% (195 to 243), yet formal post engagement metrics remained at zero. Visitors read content but do not interact directly with native blog elements.

Strategic Recommendations

Optimize Calls-to-Action (CTAs) for High Dwell-Time Visitors

- Action: Place sticky CTAs, embedded scheduling forms, and prominent phone number banners within top-read pages (such as /blog and /adult-care-homes-in-beaverton).
- Goal: Convert long dwell times (12m 45s avg. session duration) into concrete inquiries and contact submissions.

Audit and Improve the Mobile User Experience

- Action: Conduct a technical and UX audit on mobile layouts to resolve rendering, loading speed, or navigation issues causing the 13.5% decline in mobile sessions.
- Goal: Reclaim mobile traffic loss and match the strong growth seen on desktop (+28.3%).

Re-energize Organic Search & Scale Social Distribution

- Action: Perform keyword gap analysis to reverse the 8.9% drop in organic search. Double down on the content distribution strategies driving high-performing channels like Organic Social (+59.1%) and Referrals (+320%).
- Goal: Stabilize core search traffic while expanding referral networks and social touchpoints.

Monetize and Interlink High-Engagement Content

- Action: Add internal links and clear lead magnets within blog posts to guide readers seamlessly toward core service pages (/services, /about).
- Goal: Turn passive blog readers into service page leads and drive measurable user actions beyond content consumption.
