

# Lesson Notes: HighLevel Agency Pro Backend Setup (\$497 Plan)

## Lesson Overview

In this lesson, we cover the **Agency Dashboard** setup inside HighLevel Pro (\$497/month plan), enabling SaaS Mode, white labeling, domain configuration, feature toggles, Stripe integration, and preparing your agency for scalable, automated sub-account onboarding.

---

## Section 1: Understanding the Agency vs. Sub-Account Roles

### ◆ Agency Account

- Backbone of your white-labeled SaaS business.
- Sends system emails (e.g., login info, reset passwords).
- Manages billing setup and feature toggles.
- Requires setup of:
  - Payment processors
  - System email domain
  - White-label domain
  - Terms & policies

### ◆ Sub-Account (CRM)

- Where client-specific communication, funnels, and payment collection happen.
- Used for managing each client (plumber, electrician, etc.).

- You **must** create one for your own agency too.

## **Section 2: Initial Agency Setup (From Dashboard)**

### **Company Profile & Settings**

- Go to **Settings > Company Profile**.
- Fill out:
  - Name, Email, Phone, Website
  - Language, Time zone
  - Company name and branding
  - Privacy policy and terms URLs
- Add logo and favicon.

### **White Label Domain**

- Used for login (e.g., [app.yourdomain.com](#)).
- Set CNAME records via Cloudflare or DNS provider.
- Proxy OFF (Cloudflare users).
- Authorize domain from HighLevel after DNS setup.

### **API Domain**

- Used for links (calendars, etc.).
- Set another CNAME for [links.yourdomain.com](#).

## Section 3: Critical System Settings

### Privacy Policy & Terms

- Must be included for SaaS compliance.
- Add links in settings (e.g., [/privacy](#), [/terms](#)).

### Theme & Customization

- Light/dark theme
- Add custom CSS/JS if needed

### Address & Timezone

- For accurate invoicing and reporting

## Section 4: Optional (But Recommended) Toggles

| Feature                 | Recommended  |
|-------------------------|--------------|
| NPS Surveys             | ✓            |
| Product Guides          | ✓            |
| Daily Updates           | ✗ (Optional) |
| Beta Features           | ✓            |
| Enhanced Security       | ✓            |
| Template Library Access | ✓            |
| AI Employee             | ✓            |
| Workflow AI             | ✓            |

Autocomplete Addresses      Optional

Domain Purchases        
(Resell)

## **Section 5: Team Management**

### **Add Agency Team Members**

- Go to **Settings > Team**
- Add with name, email, phone
- Assign roles/permissions
- Admins have broad access—**be cautious!**

## **Section 6: Stripe & Rebilling Setup**

### **Stripe Integration**

- Connect to process payments
- Required for SaaS Mode billing

### **Rebiling Settings**

- Enable markup on features:
  - LC Phone
  - AI Employee
  - Premium Triggers

- Autocomplete
- Example: 1.5% markup on usage

## **Section 7: Email Services (System Emails)**

### **Setup Dedicated Domain**

- Use subdomain like: `noreply.yourdomain.com`
- Add DNS records
- Include **DMARC** for deliverability
- Set default headers (e.g., “System Notification”)

## **Section 8: SaaS Configurator Setup**

### **Create Plans**

- Plans can be custom or start from template
- Include:
  - Pricing
  - Snapshot (template with pipelines, funnels)
  - Feature sets
  - Add-ons (e.g., WhatsApp)

### **Trials & Credits**

- Optional: 14-day trials or one-time credits

- Recommended: Paid onboarding to avoid non-serious leads

## Section 9: Security & Subscription Settings

- Suspend Account if Payment Fails: 
- Allow Admin to Cancel: Optional
- 2FA on Sign-In: 
- Pause New Accounts: 

## Section 10: Useful Admin Tools

| Tool                                                                                                 | Description                            |
|------------------------------------------------------------------------------------------------------|----------------------------------------|
|  Prospecting      | Find new leads from HighLevel database |
|  Snapshots        | Prebuilt templates for new clients     |
|  Reselling Panel  | Manage all resellable features         |
|  Marketplace      | Buy 3rd party integrations             |
|  Template Library | Store shared funnels, emails, etc.     |
|  Affiliates       | Track commissions and referrals        |
|  Audit Logs       | Track all user/system activity         |

## Final Tips

- LC Phone > Twilio for simplicity + AI voice, IVR
- Use **GoDaddy** or **Cloudflare** for domain setup

- Always monitor usage & billing (Wallet thresholds)
- Create your agency CRM sub-account (covered in next video)

## Summary

This video covered the **Agency Backend Setup** for a white-labeled HighLevel SaaS. You should now be familiar with:

- The difference between agency and sub-account
- Setting up domains and emails
- Configuring Stripe, SaaS plans, and usage billing
- Enabling security and automation features
